SUBJECT INDEX TO VOLUME 34

2-Methoxyacetic acid toxicity, evaluation of effects on mouse germs cells, 157
2,3,7,8-TCDD:
  risk assessment of, 11
  bioassay of and implications for risk assessment, 279
Aflatoxicosis, effects on avian renal function, calcium, and vitamin D metabolism, 309
American kestrel, following exposure to diphenyl ether, 323
Antimony potassium tartrate (APT), comparative toxicity and tissue distribution of, 51
Aroclor 1254, effect of administration of, 239
Assays, indicators of exposure to toxic agents, 127

Beryllium:
  effects on alveolar macrophages, 103
  dosimetry of in cultured canine pulmonary alveolar macrophages, 433

Cadmium:
  exposure detection in rats, 39
  influence of on human uterine arteries, 187
  epidemiologic study of in hair of ceramists and dental personnel, 423
Calmodulin activity:
  effects by carbon tetrachloride and chlordecone, 219
  effects by triorganotins, 229
Carbon tetrachloride and chlordecone, combined effects of on calmodulin activity, 219
Carcinogenicity, short-term tests prediction of, 27
Ceramists, study of cadmium and lead in hair of, 423
Chlorofluorocarbon chemical structure, relationship with *Salmonella* mutagenicity, 397
Cosmetologists, exposure to toxic chemicals, 197
Crude oil, effects on immunity within mouse kin, 83

Dental personnel, study of cadmium and lead in hair of, 423
Dinitro-o-cresol (DNOC), damage induced by in rat liver, 485
Diphenyl ether herbicides, developmental toxicity of, 323
Dosimetry of beryllium, in cultured canine samples, 433

Fenarimol, damage induced by in rat liver, 485
Finnish foundry workers, analysis of white blood cells after carcinogenic hydrocarbons, 177
Flow cytometry (FCM) DNA content measurements, 157
Fluorimetric assay, in vivo induction of, 485
Forestomach, development of squamous-cell hyperplasia, 207
Furan, causing cholangiocarcinomas, 245

Hexachlorocyclohexane (HCH), effects of on rats, 495
Host defense and tumor surveillance, ozone's effects on, 449

Immunity, crude oil and ultraviolet radiation effects of, 83
Immunoglobulin production, response to ozone, 353
In vivo fluorimetric assay, as evidence of damage induced by fenarimol and DNOC, 485
Intraperiton injection, in rats, 51
Isooctyl Acrylate (IOA), acute toxicity, genotoxicity, and dermal carcinogenicity assessment of, 297

Kidney damage, mercuric chloride-induced in mice, 469
Kinetic constants, 141

Lead, epidemiologic study of in hair of ceramists and dental personnel, 423
Light and scanning electron microscopic studies, 1
Liver tumors, reaction to *ras* oncogenes, 367

AUTHOR INDEX TO VOLUME 34

Amdur, M. O., 337
Amendola, R. O., 157
Ancora, G., 485
Andersen, H. R., 469
Andersen, O., 469
Andreoli, C., 397

Wenning, R. J., 11, 279
Wideman, R. F., Jr., 309
Willington, S. E., 95
Wyatt, G., 95

Yallapragada, P. R., 229
Yasumoto, T., 1

Zajac, W., 95
Zelikoff, J. T., 449
Zimmerman, D. D., 297

Lung pyridine nucleotides, recovery of following acute ozone exposure, 115
Lymphocyte proliferation assays, as potential biomarkers for toxicant exposures, 127
Lymphocyte metallothionein (MT) gene expression, induction of to detect cadmium exposure in rats, 39

Macrophage functions, ozone's immunomodulating effects on, 449
Marine algal toxins, effects of toward freshly prepared hepatocytes, 1
Mercuric chloride-induced kidney damage, time course and effect of dose, 469
Metallothionein (MT) in lymphocytes, 39

Ozone:
  effect on lungs, 115
  effect of exposure to, 337
  effect on immunoglobulin production by human B cells, 353
  immunomodulating effects of on macrophage functions important for tumor surveillance and host defense, 449

Phosgene inhalation, effect on pulmonary influenza, 259
Phosphinate inhibitors of fetal bovine serum, 141
Polychlorinated biphenyl levels, in highly exposed workers, 413
Polycyclic aromatic hydrocarbons, postlabeling analysis of, 177
Pulmonary influenza virus infections, enhancement and prolongation following phosgene inhalation, 259
Pulmonary alveolar macrophages, exposure to beryllium metal, 103

ras oncogenes:
  hypomethylation of in chemically induced and spontaneous B6C3F1 liver tumors, 367
  differential DNase hypersensitivity of in B6C3F1, C3H/He, and C57BL6 livers, 385
Risk assessment of 2,3,7,8-TCDD, a biologically based cancer model, 11

Salmonella mutagenicity, relationships with chlorofluorocarbon chemical structure, 397
Serum polychlorinated biphenyl levels, estimating in highly exposed workers, 413
Short-term tests, in predicting carcinogenicity, 27
Squamous-cell hyperplasia, development of in the forestomach, 207
Sulfur oxide and ozone, effects of interaction between exposure to, 337
Sulfuric acid-layered ultrafine particles, 337

Technical hexachlorocyclohexane (HCH), long-term dietary study and development of no-observed-effect level of, 495
Tragacanth gum, oral toxicity of, 207
Triorganotins, in vivo effects of on calmodulin activity, 229
Tumor surveillance and host defense, ozone's effects on, 449

Ultraviolet radiation, effects on immunity within mouse skin, 83
Urinary mutagens, in cosmetologists and dental personnel, 197
Uterine arteries, reaction to cadmium ions, 187

Zinc deficiency, mechanisms of carcinogenesis in, 239
